### **DETAILED ACTION**

This Office Action is in response to an Amendment filed on 9/29/2005.

Currently, claims 1, 3-13 and 16-19 are pending.

#### ***Allowable Subject Matter***

1. Claims 1, 3-13 and 16-19 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination fails to anticipate or render obvious, the limitations of:  
...completing a CMOS device on the tensile-strained silicon cap, wherein the CMOS device includes a source region and a drain region which are both in electrical contact with a tensile-strained silicon cap, including well ion implantation, threshold voltage adjustment, STI device isolation, gate oxidation, gate electrode and sidewall nitride formation; etching of gate oxide after formation of sidewall nitride; etching of exposed second tensile-strained silicon cap to expose second relaxed SiGe layer in the source region and the drain region; selectively laterally etching of any SiGe layer at the source and drain region and selectively laterally etching of any SiGe layer located beneath the gate and nitride spacers, forming a resulting tunnel, which is left empty or filled with a dielectric, as required by claims 1, 7 and 16, respectively .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
